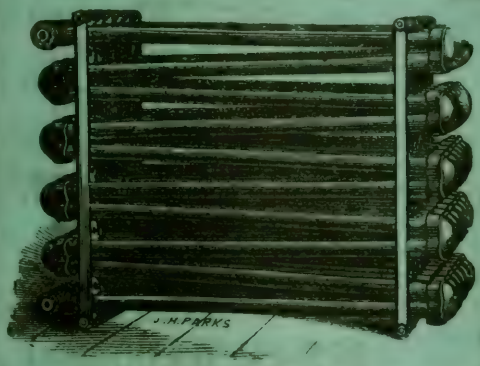
ENGINEERS,

And Manufacturers of High and Low Pressure

Steam Heating Apparatus,



FOR

PUBLIC AND PRIVATE

BUILDINGS.

SPECIAL ATTENTION GIVEN TO

HEATING FACTORIES

BY

EXHAUST STEAM.

We are prepared to contract for warming and ventilating by STEAM, Public or Private Buildings of any size or construction, either by DIRECT OR INDIRECT radiation, high or low pressure.

By the first method we place coils or radiators in the various rooms, and convey the steam to them through mains properly run and connected. The coils can be protected, if required, with ornamental screens and marble tops.

By the second method, the coils are placed in chambers in the basement and convey the heat through flues to the different rooms above. For return circulating heating work, which is now adopted by nearly all the principal houses engaged in heating, our IMPROVED VERTICAL TUBE COIL is the best that has been tried. It works equally well with high or low pressure, without noise, and contains more heating surface in less space, besides being highly ornamental.

For buildings in which they have been successfully used, we refer to the following:
